

STUDENT PROFILE

TSE KA YAN – HONG KONG

As I was born in the UK I had always wanted to study there and to go to a top UK University.

In 2008 I chose to go to Bilborough College Nottingham to study A-Levels. I was one of the first international students to go there.

The college facilities are very good especially for Science practical's and I was surprised at first by the number of UK students going there almost 2000 which was much bigger than my old school in Hong Kong. There is also a really big sports hall on the campus.

Everyone was so friendly there and I have made some really good UK friends now. The teaching methods allow you to explore the subjects in more depth than in Hong Kong. All the teachers are friendly and explain things patiently and clearly.

Nottingham is a nice small city, good for students with lots of things to do .It is also in the middle of England and it is easy to travel to other cities. I have visited Edinburgh/ Bath/Bristol/Oxford /York and London with friends.

I lived in a homestay with an older couple who were very experienced at looking after international students. I travelled to the college everyday by the college bus which took 30 minutes and was very good.

My 2 years at Bilborough College were happy and successful. Although I thought that I would do well in my exams. I was totally surprised when the results came out and I got 1A* and 3 As. I am so happy and my parents are too so that I have now achieved my ambition of going to the LSE one of the very best universities in the UK

I would recommend Bilborough College to any Hong Kong student who wants to study A-Levels.
